Skills

Spoken Languages

Russian, English

Languages

C#, GML, Dart, Swift, JavaScript, Java, TypeScript, Solidity, GLSL

Frameworks

Flutter, Xamarin, Android SDK, Xcode, .NET, Unity, Game Maker, Angular, React, EF Core, Metal, Node.js, Laravel, Vue

Tools

Git, Firebase, Google Analytics, REST API, MySQL, Jira, Postman, JetBrain Toolset, Vim, ShaderToy, Docker, Kubernetes, Jenkins, Grafana, Ansible

UI / UX

Figma, Adobe Suite, Sketch, Pixelmator

Web Development

JavaScript, HTML, CSS, Tilda, OpenGL

Platforms

Android, iOS, macOS, tvOS, WearOS, Web, Windows, Amazon, Blockchain, Linux

AI Tools

ChatGPT, Perplexity, Cursor, Grok, Fooocus AI, DeepSeek

Education

Udemy

2025

Linux Foundation Computer Science

Certified Kubernetes Administrator

Wargaming Forge

2020

Level Designer & Balancing degree

Siberian State Industrial University

2017-unfinished

Faculty of Information Technology

Quality Management Computer Systems

Summary

About me

Mobile & web fullstack and Unity developer with over 10 years of experience in game and mobile app development, currently practicing DevOps competencies.
Worked across gamedev, fintech, and mobile sectors, creating apps, services and games from scratch and LTS.
Skilled in developing complex game mechanics, web applications, generators, and process automation.
Currently learning Swift, creating small apps, practicing UX/UI, electronics, cycling, and music.

Key Achievements

✅ Sand Balls – **100M+** downloads, Top 10 in App Store
✅ Bhop Jump – **$160K+** in revenue in first quarter
✅ **Top 5%** Freelancer on Upwork (Top Rated Plus within 6 months)
✅ Lana and Ronen – seasonal hit, **1M+** downloads

Work Experience

InfoScale — DevOps Engineer
Dec 2024 – Current

> Developed internal monitoring system for web services that increased feedback time up to 75%

> Set up monitoring and alerting systems, cutting average incident response time by 60%

> Installed, configured, and optimized 1000+ Linux servers for production use, covering network setup and service deployment.

SOFTINTERMOB — Unity Developer
Nov 2023 – Jul 2024

> Implemented complex gameplay systems and UI in Unity, improving feature delivery speed by 30%

> Translated Figma mockups into optimized, responsive in-game interfaces for 4 brand new projects

> Integrated analytics tools and REST APIs, tested endpoints with Postman, reducing crash reports by 20%.

AZNResearch — Fullstack Developer
Jul 2022 – Oct 2023

> Developed internal tools using Angular, Tailwind, C#, and EF Core, reducing manual operations by 40%

> Connected frontend and backend systems, improving user response time by 25%

> Wrote 100+ unit tests and integrated third-party APIs, ensuring 95% test coverage across modules

Neosight — Game Designer (project based)
Nov 2021 – Feb 2022

> Designed and balanced 50+ game levels, improving average user retention by 18%

> Created game design documentation and implemented metric-driven iteration

> Worked closely with the dev team to refine core mechanics based on player feedback and analytics

Udemy — Unity Developer (project based)
Mar 2021 – Oct 2021

> Developed a Unity-based educational language-learning app used by 10K+ users

> Implemented interactive learning modules and tracking features with C# and Unity UI

> Reduced app size by 20% through asset optimization and code refactoring

Goodline — Software Engineer
Nov 2019 – Jan 2020

> Built cross-platform mobile applications using React Native, reducing code duplication by 40%

> Integrated REST APIs and local storage for offline support and real-time sync

> Improved app performance by 25% through profiling and optimization

Project Tech — Software Engineer
Feb 2017 – Oct 2019

> Developed custom mobile solutions for businesses, increasing client satisfaction by 35%

> Led a team expansion from 3 to 6 developers, mentoring junior teammates

> Delivered 10+ mobile apps on time and within budget, focusing on UX and performance
